PROFESSIONAL SUMMARY

Information Science and Engineering student who has authored an IEEE-submitted blockchain research paper, co-founded two student technical initiatives (MATRIX Robotics, STEPCRAFT), and organized a national-level hackathon that drew 600+ registrants and 65 finalist teams. Two-time robotics competition champion (2025, 2026) with hands-on experience across full-stack development, IoT hardware integration, and applied blockchain security.

EDUCATION

B.E. in Information Science and Engineering | Channabasaveshwara Institute of Technology, Gubbi

7th Semester | CGPA: 7.26 | Expected Graduation: 2027

PUC / Class 12 | KVR Maruthi PU College, Tumkur

Graduated: 2023 | 77%

TECHNICAL SKILLS

Languages: Java, Python, C, JavaScript

Technologies & Tools: Ethereum Blockchain, Fusion 360, Ansys, Git, Canva, Video Editing

Hardware & IoT: PoE Switches, Flow Sensors, Soil Moisture Sensors, NPK Sensors, Basic Automation

Spoken Languages: Kannada (Fluent), English (Fluent/Intermediate), Hindi (Intermediate)

PROJECTS

Decentralized Online Voting System | *Ethereum, Blockchain Security*

- Developed a highly secure online voting platform utilizing the Ethereum blockchain and two-step verification to ensure transparent data integrity.
- Authored and presented a comprehensive research paper detailing the system's architecture, successfully submitted under IEEE.

Smart Farm System (Ongoing) | *IoT Hardware, App Integration*

- Designing an intelligent, physical agricultural monitoring system integrating PoE switches, flow sensors, and soil moisture sensors.
- Aggregating real-time physical data into a centralized mobile application to enable remote tracking and automated crop management.

E-Commerce Platform for Educational Kits | *React, Node.js, MongoDB*

- Built and deployed a full-stack e-commerce platform (React, Node.js, MongoDB) enabling customers to browse, order, and track custom educational engineering kits end-to-end.

AI Health Assistant | *Python, Rule-Based Health Scoring*

- Engineered a healthcare website with an interactive chatbot in Python during a 24-hour hackathon sprint.
- Designed a rule-based scoring engine that evaluates user-reported symptoms against a weighted risk model to flag potential health concerns.

LEADERSHIP & EXPERIENCE

Core Team Organizer | SkyHack 2.0

- Orchestrated a national-level hackathon (March 2026), successfully driving an initial registration pool of over 600 participants.
- Conceptualized and produced detailed, scene-by-scene promotional video content to boost registration deadlines, ultimately resulting in a massive offline finals event hosting 65 teams and 300+ attendees.

Founder & Team Lead | MATRIX Team

- Founded an inter-college robotics team, actively managing 10 members through technical collaboration and rigorous competition preparation.

Social Media & IT Technical Head | Astrakshaya

- Directed IT operations and digital presence for a specialized 4-member student rocketry and research firm.

Co-Founder | STEPCRAFT

- Established a student-led support platform dedicated to providing resources and guidance for IoT and electronics projects.

ACHIEVEMENTS & CERTIFICATIONS

- Champion:** Won 1st place in the robotics competition at Magnovite 2025 (Christ University, Bangalore).
- Champion:** Won 1st place in the robotics competition at Enigma 2026 (Malnad College of Engineering).
- Certifications:** Successfully completed advanced NPTEL coursework in Cloud Computing and Python.
